Subject index

Acidic media
Quartz crystal microbalance study on the electrochemical dissolution of iron in organic media of different acidities. Application to the formation of polypyrrole films on iron electrodes (Ferreira et al.) 357
Acid media
The kinetics of the reduction processes of PbO film in H_2SO_4. Part 3. Potential step method in Pb+Ca alloy electrodes (Guo) 117
Cyclic voltammetric and potential-modulated reflectance spectroscopic study of the electroadsorption of methanol and ethanol on a platinum electrode in acid and alkaline media (Caram, Gutiérrez) 213
EMIRS studies of formic acid electrooxidation on Pd, Au and Pd+Au alloys. Part 1. Investigation of the adsorbates derived from HCOOH and NaCOOH chemisorption at Pd in acid and alkaline solutions (Vela et al.) 289
Voltammetric study of the electrochemical behaviour of glycolic acid solutions in sulphuric acid on platinum single-crystal electrodes with basal orientations (Orts et al.) 303
Acid solutions
Study of relaxation current oscillations observed during the transition from the active to the passive state of a cobalt electrode in phosphoric acid solutions (Sazou, Pagitsas) 247
Adsorption
Cyclic voltammetric and potential-modulated reflectance spectroscopic study of the electroadsorption of methanol and ethanol on a platinum electrode in acid and alkaline media (Caram, Gutiérrez) 213
Alkaline media
Cyclic voltammetric and potential-modulated reflectance spectroscopic study of the electroadsorption of methanol and ethanol on a platinum electrode in acid and alkaline media (Caram, Gutiérrez) 213
EMIRS studies of formic acid electrooxidation on Pd, Au and Pd+Au alloys. Part 1. Investigation of the adsorbates derived from HCOOH and NaCOOH chemisorption at Pd in acid and alkaline solutions (Vela et al.) 289
In situ FTIRS features during oxygen adsorption and carbon monoxide oxidation at a platinum electrode in dilute alkaline solutions (Sun, Chen) 319
Amperometry
Amperometric enzyme electrodes. Part 5. The homogeneous mediated mechanism (Albery et al.) 77
Aniline
Polyaniline-based membranes for gas electrodes (Fabrizio et al.) 197

Basal orientations
Voltammetric study of the electrochemical behaviour of glycolic acid solutions in sulphuric acid on platinum single-crystal electrodes with basal orientations (Orts et al.) 303
Bicarbonate solutions
Study of iron electrodissolution in carbonate/bicarbonate solutions by electrochemical impedance spectroscopy (Castro, Vilche) 231

Calcium
The kinetics of the reduction processes of PbO film in H_2SO_4. Part 3. Potential step method in Pb+Ca alloy electrodes (Guo) 117
Carbonate solutions
Study of iron electrodissolution in carbonate/bicarbonate solutions by electrochemical impedance spectroscopy (Castro, Vilche) 231

Carbon monoxide
In situ FTIRS features during oxygen adsorption and carbon monoxide oxidation at a platinum electrode in dilute alkaline solutions (Sun, Chen) 319
Catalytic centers
Preparation and electrochemical characterization of O-transfer catalytic centers in thin films of mixed-valence ruthenium oxide cross-linked with cyanide (Kulesza, Bandoch) 131
Chemisorption
EMIRS studies of formic acid electrooxidation on Pd, Au and Pd + Au alloys. Part 1. Investigation of the adsorbates derived from HCOOH and NaCOOH chemisorption at Pd in acid and alkaline solutions (Vela et al.) 289
Cobalt
Study of relaxation current oscillations observed during the transition from the active to the passive state of a cobalt electrode in phosphoric acid solutions (Sazou, Pagitsas) 247
Cyclic voltammetry of $Na[PcCo(CN)_2]$. Analysis of adsorption phenomena during electro-oxidation (Leverenz et al.) 275
Conduction
Mixed-valence electron hopping, redox conduction and migration effects in solid-state electrochemistry of transition metal hexacyanoferrates (Kulesza, Galus) 261
Convolution
Analysis of cyclic voltammetric responses by Fourier transform-based deconvolution and convolution procedures (Pilo et al.) 103
Cyanide
Preparation and electrochemical characterization of O-transfer catalytic centers in thin films of mixed-valence ruthenium oxide cross-linked with cyanide (Kulesza, Bandoch) 131
Cyanide ions
Cyclic voltammetry of $Na[PcCo(CN)_2]$. Analysis of adsorption phenomena during electro-oxidation (Leverenz et al.) 275
Cyclic voltammetry
Analysis of cyclic voltammetric responses by Fourier transform-based deconvolution and convolution procedures (Pilo et al.) 103
Cyclic voltammetric and potential-modulated reflectance spectroscopic study of the electroadsorption of methanol and ethanol on a platinum electrode in acid and alkaline media (Caram, Gutiérrez) 213
Cyclic voltammetry of $Na[PcCo(CN)_2]$. Analysis of adsorption phenomena during electro-oxidation (Leverenz et al.) 275
Cytochrome *c*
The reduction of Fe(methylphenanthroline)$_3^{3+}$ by cytochrome *c* (Magner) 369

Deconvolution
Analysis of cyclic voltammetric responses by Fourier transform-based deconvolution and convolution procedures (Pilo et al.) 103
Diffusion
Multidimensional integral equations. Part 1. A new approach to solving microelectrode diffusion problems (Mirkin, Bard) 1
Multidimensional integral equations: a new approach to solving microelectrode diffusion problems. Part 2. Applications to microband electrodes and the scanning electrochemical microscope (Mirkin, Bard) 29
Radial diffusion in electrochemistry of two-dimensional systems at the air–water interface (Charych et al.) 339
A generalised diffusion–migration equation for long distance electron hopping between redox centres (Mohan, Sangaranarayanan) 375
Dissociation curves
A simple expression for the redox titration curve (De Levie) 347

Electrochemical microscopy
Multidimensional integral equations: a new approach to solving microelectrode diffusion problems. Part 2. Applications to microband electrodes and the scanning electrochemical microscope (Mirkin, Bard) 29
Electron hopping
Mixed-valence electron hopping, redox conduction and migration effects in solid-state electrochemistry of transition metal hexacyanoferrates (Kulesza, Galus) 261
A generalised diffusion–migration equation for long distance electron hopping between redox centres (Mohan, Sangaranarayanan) 375
Electroreduction
Inhibition of the electroreduction of $Fe(CN)_6^{3-}$ at microelectrodes in the absence

of supporting electrolyte. Mediation of the inhibited reduction by methyl viologen (Lee, Anson) 381

EMIRS

EMIRS studies of formic acid electrooxidation on Pd, Au and Pd + Au alloys. Part 1. Investigation of the adsorbates derived from HCOOH and NaCOOH chemisorption at Pd in acid and alkaline solutions (Vela et al.) 289

Enzyme electrodes

Amperometric enzyme electrodes. Part 5. The homogeneous mediated mechanism (Albery et al.) 77

Ethanol

Cyclic voltammetric and potential-modulated reflectance spectroscopic study of the electroadsorption of methanol and ethanol on a platinum electrode in acid and alkaline media (Caram, Gutiérrez) 213

Ferrocyanide

Inhibition of the electroreduction of Fe $(CN)_6^{3-}$ at microelectrodes in the absence of supporting electrolyte. Mediation of the inhibited reduction by methyl viologen (Lee, Anson) 381

Flame annealing

Initial surface structure of flame-annealed Au(100) in aqueous solution. Consistency between in-situ scanning tunneling microscopy and electrochemical results (Hamelin et al.) 361

Formation curves

A simple expression for the redox titration curve (De Levie) 347

Formic acid

EMIRS studies of formic acid electrooxidation on Pd, Au and Pd + Au alloys. Part 1. Investigation of the adsorbates derived from HCOOH and NaCOOH chemisorption at Pd in acid and alkaline solutions (Vela et al.) 289

Fourier transform method

Analysis of cyclic voltammetric responses by Fourier transform-based deconvolution and convolution procedures (Pilo et al.) 103

FTIRS

In situ FTIRS features during oxygen adsorption and carbon monoxide oxidation at a platinum electrode in dilute alkaline solutions (Sun, Chen) 319

Gas electrodes

Polyaniline-based membranes for gas electrodes (Fabrizio et al.) 197

Glucose

The electro-oxidation of glucose on microcolumnar gold electrodes in different neutral solutions (Luna et al.) 149

Glycolic acid

Voltammetric study of the electrochemical behaviour of glycolic acid solutions in sulphuric acid on platinum single-crystal electrodes with basal orientations (Orts et al.) 303

Gold

Oxygen reduction on Au (100) and vicinal Au (910) and Au (11, 1, 1) faces in alkaline solution. A rotating disc–ring study (Štrbac et al.) 179

EMIRS studies of formic acid electrooxidation on Pd, Au and Pd + Au alloys. Part 1. Investigation of the adsorbates derived from HCOOH and NaCOOH chemisorption at Pd in acid and alkaline solutions (Vela et al.) 289

Initial surface structure of flame-annealed Au(100) in aqueous solution. Consistency between in-situ scanning tunneling microscopy and electrochemical results (Hamelin et al.) 361

Gold electrodes

The electro-oxidation of glucose on microcolumnar gold electrodes in different neutral solutions (Luna et al.) 149

Radiotracer study of the electrosorption of a simple peptide molecule on gold and platinized platinum electrodes (Horányi et al.) 329

Hexacyanoferrates

Mixed-valence electron hopping, redox conduction and migration effects in solid-state electrochemistry of transition metal hexacyanoferrates (Kulesza, Galus) 261

Homogeneous mediated mechanisms

Amperometric enzyme electrodes. Part 5. The homogeneous mediated mechanism (Albery et al.) 77

Impedance spectroscopy

Study of iron electrodissolution in carbonate/bicarbonate solutions by electrochemi-

cal impedance spectroscopy (Castro, Vilche) 231

Interfaces

Radial diffusion in electrochemistry of two-dimensional systems at the air–water interface (Charych et al.) 339

Iron

Quartz crystal microbalance study on the electrochemical dissolution of iron in organic media of different acidities. Application to the formation of polypyrrole films on iron electrodes (Ferreira et al.) 357

The reduction of Fe(methylphenanthroline)$_3^{3+}$ by cytochrome *c* (Magner) 369

Iron electrodissolution

Study of iron electrodissolution in carbonate/bicarbonate solutions by electrochemical impedance spectroscopy (Castro, Vilche) 231

Kinetics

The kinetics of the reduction processes of PbO film in H_2SO_4. Part 3. Potential step method in Pb+Ca alloy electrodes (Guo) 117

KW

EMIRS studies of formic acid electrooxidation on Pd, Au and Pd+Au alloys. Part 1. Investigation of the adsorbates derived from HCOOH and NaCOOH chemisorption at Pd in acid and alkaline solutions (Vela et al.) 289

lead

The kinetics of the reduction processes of PbO film in H_2SO_4. Part 3. Potential step method in Pb+Ca alloy electrodes (Guo) 117

Lead oxide

The kinetics of the reduction processes of PbO film in H_2SO_4. Part 3. Potential step method in Pb+Ca alloy electrodes (Guo) 117

Membranes

Polyaniline-based membranes for gas electrodes (Fabrizio et al.) 197

Methanol

Cyclic voltammetric and potential-modulated reflectance spectroscopic study of the electroadsorption of methanol and ethanol on a platinum electrode in acid and alkaline media (Caram, Gutiérrez) 213

Microband electrodes

Multidimensional integral equations: a new approach to solving microelectrode diffusion problems. Part 2. Applications to microband electrodes and the scanning electrochemical microscope (Mirkin, Bard) 29

Microcolumnar electrodes

The electro-oxidation of glucose on microcolumnar gold electrodes in different neutral solutions (Luna et al.) 149

Microelectrodes

Multidimensional integral equations. Part 1. A new approach to solving microelectrode diffusion problems (Mirkin, Bard) 1

Multidimensional integral equations: a new approach to solving microelectrode diffusion problems. Part 2. Applications to microband electrodes and the scanning electrochemical microscope (Mirkin, Bard) 29

Steady-state voltammetry at microelectrodes of arbitrary shape (Oldham) 53

Inhibition of the electroreduction of Fe(CN)$_6^{3-}$ at microelectrodes in the absence of supporting electrolyte. Mediation of the inhibited reduction by methyl viologen (Lee, Anson) 381

Migration

Mixed-valence electron hopping, redox conduction and migration effects in solid-state electrochemistry of transition metal hexacyanoferrates (Kulesza, Galus) 261

A generalised diffusion–migration equation for long distance electron hopping between redox centres (Mohan, Sangaranarayanan) 375

Modified electrodes

Amperometric enzyme electrodes. Part 5. The homogeneous mediated mechanism (Albery et al.) 77

Multidimensional integral equations

Multidimensional integral equations. Part 1. A new approach to solving microelectrode diffusion problems (Mirkin, Bard) 1

Multidimensional integrals

Multidimensional integral equations: a new approach to solving microelectrode diffusion problems. Part 2. Applications to microband electrodes and the scanning electrochemical microscope (Mirkin, Bard) 29

Oligopeptides
Radiotracer study of the electrosorption of a simple peptide molecule on gold and platinized platinum electrodes (Horányi et al.) 329
Organic media
Quartz crystal microbalance study on the electrochemical dissolution of iron in organic media of different acidities. Application to the formation of polypyrrole films on iron electrodes (Ferreira et al.) 357
Oxygen adsorption
In situ FTIRS features during oxygen adsorption and carbon monoxide oxidation at a platinum electrode in dilute alkaline solutions (Sun, Chen) 319
Oxygen reduction
Oxygen reduction on Au (100) and vicinal Au (910) and Au (11, 1, 1) faces in alkaline solution. A rotating disc–ring study (Štrbac et al.) 179
Oxygen transfer
Preparation and electrochemical characterization of O-transfer catalytic centers in thin films of mixed-valence ruthenium oxide cross-linked with cyanide (Kulesza, Bandoch) 131

Palladium
EMIRS studies of formic acid electrooxidation on Pd, Au and Pd + Au alloys. Part 1. Investigation of the adsorbates derived from HCOOH and NaCOOH chemisorption at Pd in acid and alkaline solutions (Vela et al.) 289
Phenanthroline
The reduction of Fe(methylphenanthroline)$_3^{3+}$ by cytochrome *c* (Magner) 369
Phosphoric acid
Study of relaxation current oscillations observed during the transition from the active to the passive state of a cobalt electrode in phosphoric acid solutions (Sazou, Pagitsas) 247
Phthalo-cyanines
Cyclic voltammetry of Na[PcCo(CN)$_2$]. Analysis of adsorption phenomena during electro-oxidation (Leverenz et al.) 275
Platinized electrodes
Radiotracer study of the electrosorption of a simple peptide molecule on gold and platinized platinum electrodes (Horányi et al.) 329
Platinum
Cyclic voltammetric and potential-modulated reflectance spectroscopic study of the electroadsorption of methanol and ethanol on a platinum electrode in acid and alkaline media (Caram, Gutiérrez) 213
Voltammetric study of the electrochemical behaviour of glycolic acid solutions in sulphuric acid on platinum single-crystal electrodes with basal orientations (Orts et al.) 303
In situ FTIRS features during oxygen adsorption and carbon monoxide oxidation at a platinum electrode in dilute alkaline solutions (Sun, Chen) 319
Polyaniline
Polyaniline-based membranes for gas electrodes (Fabrizio et al.) 197
Potential modulation
Cyclic voltammetric and potential-modulated reflectance spectroscopic study of the electroadsorption of methanol and ethanol on a platinum electrode in acid and alkaline media (Caram, Gutiérrez) 213
Potential step method
The kinetics of the reduction processes of PbO film in H_2SO_4. Part 3. Potential step method in Pb + Ca alloy electrodes (Guo) 117
Pyrrole
Quartz crystal microbalance study on the electrochemical dissolution of iron in organic media of different acidities. Application to the formation of polypyrrole films on iron electrodes (Ferreira et al.) 357

Quartz crystal microbalance
Quartz crystal microbalance study on the electrochemical dissolution of iron in organic media of different acidities. Application to the formation of polypyrrole films on iron electrodes (Ferreira et al.) 357

Radial diffusion
Radial diffusion in electrochemistry of two-dimensional systems at the air–water interface (Charych et al.) 339
Radiotracing
Radiotracer study of the electrosorption of a simple peptide molecule on gold and platinized platinum electrodes (Horányi et al.) 329

Redox
Mixed-valence electron hopping, redox conduction and migration effects in solid-state electrochemistry of transition metal hexacyanoferrates (Kulesza, Galus) 261
Redox centres
A generalised diffusion–migration equation for long distance electron hopping between redox centres (Mohan, Sangaranarayanan) 375
Redox titration curves
A simple expression for the redox titration curve (De Levie) 347
Reduction
The kinetics of the reduction processes of PbO film in H_2SO_4. Part 3. Potential step method in Pb + Ca alloy electrodes (Guo) 117
The reduction of Fe(methylphenanthroline)$_3^{3+}$ by cytochrome *c* (Magner) 369
Inhibition of the electroreduction of $Fe(CN)_6^{3-}$ at microelectrodes in the absence of supporting electrolyte. Mediation of the inhibited reduction by methyl viologen (Lee, Anson) 381
Reflectance spectroscopy
Cyclic voltammetric and potential-modulated reflectance spectroscopic study of the electroadsorption of methanol and ethanol on a platinum electrode in acid and alkaline media (Caram, Gutiérrez) 213
Relaxation current oscillations
Study of relaxation current oscillations observed during the transition from the active to the passive state of a cobalt electrode in phosphoric acid solutions (Sazou, Pagitsas) 247
Rotating disc–ring study
Oxygen reduction on Au (100) and vicinal Au (910) and Au (11, 1, 1) faces in alkaline solution. A rotating disc–ring study (Štrbac et al.) 179
Ruthenium oxide
Preparation and electrochemical characterization of O-transfer catalytic centers in thin films of mixed-valence ruthenium oxide cross-linked with cyanide (Kulesza, Bandoch) 131

Scanning
Multidimensional integral equations: a new approach to solving microelectrode diffusion problems. Part 2. Applications to microband electrodes and the scanning electrochemical microscope (Mirkin, Bard) 29
Sodium
Cyclic voltammetry of $Na[PcCo(CN)_2]$. Analysis of adsorption phenomena during electro-oxidation (Leverenz et al.) 275
Solid-state voltammetry
Voltammetry of vanadyl sulfate hydrates in the absence of a deliberately added liquid phase (Gorski, Cox) 163
Steady-state voltammetry
Steady-state voltammetry at microelectrodes of arbitrary shape (Oldham) 53
STM
Initial surface structure of flame-annealed Au(100) in aqueous solution. Consistency between in-situ scanning tunneling microscopy and electrochemical results (Hamelin et al.) 361
Sulphuric acid
The kinetics of the reduction processes of PbO film in H_2SO_4. Part 3. Potential step method in Pb + Ca alloy electrodes (Guo) 117
Voltammetric study of the electrochemical behaviour of glycolic acid solutions in sulphuric acid on platinum single-crystal electrodes with basal orientations (Orts et al.) 303
Surface structure
Initial surface structure of flame-annealed Au(100) in aqueous solution. Consistency between in-situ scanning tunneling microscopy and electrochemical results (Hamelin et al.) 361

Thin films
Preparation and electrochemical characterization of O-transfer catalytic centers in thin films of mixed-valence ruthenium oxide cross-linked with cyanide (Kulesza, Bandoch) 131
Transition metals
Mixed-valence electron hopping, redox conduction and migration effects in solid-state electrochemistry of transition metal hexacyanoferrates (Kulesza, Galus) 261
Two dimensional systems
Radial diffusion in electrochemistry of two-dimensional systems at the air–water interface (Charych et al.) 339

Ultramicro electrodes
Voltammetry of vanadyl sulfate hydrates in the absence of a deliberately added liquid phase (Gorski, Cox) 163

Vanadyl sulphate
Voltammetry of vanadyl sulfate hydrates in the absence of a deliberately added liquid phase (Gorski, Cox) 163

Vicinal faces
Oxygen reduction on Au (100) and vicinal Au (910) and Au (11, 1, 1) faces in alkaline solution. A rotating disc–ring study (Štrbac et al.) 179

Viologe
Inhibition of the electroreduction of Fe $(CN)_6^{3-}$ at microelectrodes in the absence of supporting electrolyte. Mediation of the inhibited reduction by methyl viologen (Lee, Anson) 381

Voltammetry
Voltammetric study of the electrochemical behaviour of glycolic acid solutions in sulphuric acid on platinum single-crystal electrodes with basal orientations (Orts et al.) 303
